## Sustainable and Innovative – Communities of Practice as Drivers of a new Agenda on Integration

### Virtual exchange

---

9 June 2021

2:00-5:00 pm CEST

Location: Hosted via Zoom by ICMPD | [Link](#)

### Agenda

#### Background

In response to the large-scale refugee arrivals in 2015 and 2016, a number of initiatives has been launched at the local, national and supranational level, which aim to provide integration services for those newly arrived. At the same time, responding to the fact that a number of EU Member States can be considered as immigration countries for 50 years or more, integration services become more and more mainstreamed into standard social services. This led to an intensification and upscaling of already existing practices, and to various innovations, including new tools and approaches.

Despite the accumulation of knowledge as well as ongoing knowledge exchanges, there remain significant challenges in making such knowledge relevant for the specific challenges practitioners and policymakers face when designing, implementing and evaluating practices in their own specific contexts. Against this background, the **overall objective of the EU-funded SPRING project is to develop a toolbox relevant for diverse communities of practices working on integration and supporting these in identifying and accessing validated information on sustainable practices of integration**, including information on their impacts and transferability.

Against this background, the virtual exchange aims:

- To engage **relevant communities of practice** and foster exchange on successful and sustainable practices targeted at the integration of newly arrived migrants;
- To identify concrete **needs for and obstacles in accessing information** on relevant research results and evidence on sustainable and effective integration policy practices.

## COMMUNITIES OF PRACTICE

### Participants and format

The virtual exchange will **bring together Communities of Practice from research, policy and practice** working on the integration of newly arrived migrants and refugees at local, national and regional levels, bridging perspectives from different localities, such as urban or rural areas.

The event is limited to a total number of **50 participants** to allow for a productive and rich information exchange. To better ensure frank discussions and engagement on the policy options and their potential further development, **Chatham House Rules** will be applied.

The workshop will arrive at a baseline of priorities, needs, gaps and good practices in accessing knowledge and evidence. Collaborative online tools such as Mural and Mentimeter will be used.
