

## **“Become an Animal Adventurer.”**

Dear School Leader,

National Geographic Learning is excited to announce Project Exploration 2.0, an interactive and enriching virtual learning experience in English for students in Kindergarten- Grade 2. Students will take a journey through various habitats and learn through the exploration of different texts and sources how animals survive in their natural environments. Learners will use a variety of resources and engage in STEM based activities to learn about habitats and how to protect animals impacted by an everchanging global environment – all whilst building their English language and literacy skills.

The session will be hosted by a National Geographic Learning Academic Specialist, with a special guest appearance from a National Geographic Explorer! During the 30-minute session students will delve into important global issues as they build skills in literacy, science, and critical thinking. The event will be held via LIVE Zoom webinar (and live\* streamed on YouTube if your students are watching at home).

As we would like to truly enhance the learning experience for students, they will receive an activity before the session to activate their prior knowledge about the topic. Additionally, each class will use their investigation and innovation skills to complete a culminating project. Information regarding resources, activities, and the “Save the Animals Project” will be shared with Teachers once they have completed the registration process below.

### **Registration Information:**

**Wednesday, 9<sup>th</sup> June 2021**

12:30 pm – 01:00 pm  
09:30 am – 10:00 am

**GST (*Gulf Standard Time*)**  
**BST (*British Summer Time*)**

Participating teachers must register for the session via the Zoom registration link to receive pre-activities and exclusive YouTube live link for students viewing the session at home.
